EDUCATION

Dr. D. Y. Patil Institute of Management & Research   Pune, India
Master of Computer Application; GPA: 7.98   **Nov 2022 - May 2024**
Vivek College of Commerce   Mumbai, India
Bachelor of Science - Information Technology; GPA: 8.30   **Aug 2019 - June 2022**

SKILLS SUMMARY

- **Language**:   JavaScript, Java
- **Frameworks**: React.js, Node.js, Express.js, Tailwind
- **Database**:   MongoDB
- **Platforms**:   Visual Studio Code, Github, Postman

EXPERIENCE

The Entrepreneurship Network | Remote
MERN Stack Developer Intern | Mar 2024 - May 2024

- Implemented responsive and dynamic user interfaces with React.js and Tailwind.
- Contributed to backend development using Node.js and Express.js, working on various parts of the project to enhance my understanding of full-stack development.
- Gained experience in both frontend and backend development, contributing to a cohesive and functional application.
- Worked closely with team members, utilizing version control tools like Git and GitHub to manage and integrate code efficiently.

PROJECTS

StudyNotion | Link | Github   **November 2023 - February 2024**

- Designed and developed a comprehensive EdTech platform utilizing the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- The project seamlessly integrates various functionalities catering to both instructors and students, ensuring a robust and user-friendly environment.
- The platform includes features such as secure authentication for user accounts, role-based access control for instructors and students.
- It offers seamless enrollment and payment integration for students, while instructors can easily create, manage, and update course content.
- Utilizing Redux for streamlined state management, the platform ensures smooth data flow and enhances user interaction.

Shopping Cart | Link | Github   **August 2023**

- Shopping interface which shows items adding to cart and deleting using Redux state management.

Weather App | Link | Github   **April 2023**

- Developed a Weather App using JavaScript, HTML, and CSS, integrating the OpenWeatherMap API.
- The app provides real-time weather updates for the user's current location and allows searching for weather in specific locations.
